

# CNC OPERATION PANEL INNOVATION

Future Life Technology Company is a specialist in designing and manufacturing professional CNC Operational Panel. We specialize in designs for CNC machine makers who use Mitsubishi, Fanuc, Fagor, or Siemens controllers. We step ahead to lead the market and do our utmost to ensure the highest quality and achieve customers' satisfaction.

## Design Framework

## Advantage Analysis of CNC Assembled Operation Panel

- Modular design provides flexibility for customers to meet various requirements
- Laser legends for long term use
- Water-proof buttons of acrylic resin extend operation panel lifetime
- Module design is easy for user to replace, maintain and service
- Back light design enhances the safety of operators
- Match up each CNC machine and retain acrylic buttons for backup reservation
- SMD manufacturing process reduces assembly error rate
- Save working hours for mass production
- Budget saving
